

Healthier Hospitals: Healthy Interiors Fabric List

In support of the Healthy Interiors goal of the Healthier Hospitals Safer Chemicals Challenge, Version 2.0:

- Fabrics listed below are free of vinyl (PVC), flame retardants, antimicrobial, and stain and water repellent treatment (derived from per- or poly-fluorinated compounds).
- Fabrics shown below may not be available on all HHI compliant products listed, due to manufacturing constraints. See specification guides or Haworth Surface Collection websites for product fabric availability.
- Refer to Haworth Surface Collection websites for specific price grades.
- Additional fabrics may be added to the list once assessed and confirmed compliant.
- Customers are responsible for COM fabric compliance (chemical content and surface treatments).
- Polyurethane fabrics are noted with an asterisk (*). Silicone fabrics are noted with two asterisks (**).
