--------------------	-----------

Products are subject to compliance exceptions around finishes and specification. Please refer to page 2 for further guidance.

Additional Haworth products are available as well, pending discussion on finishes, options, etc. Also please refer to the list of Haworth approved fabrics, which also meet the Healthy Interiors goal, found at [surfaces.haworth.com/resources](https://surfaces.haworth.com/resources).

Furniture described herein meets the Healthy Interiors goal of the Safer Chemicals Challenge according to the manufacturer. Practice Green health does not verify this information.

Please contact [Anne.McManus@haworth.com](mailto:Anne.McManus@haworth.com) for more information.

## Haworth Product Compliance Guidance

### Formaldehyde

Haworth products listed are GREENGUARD certified and meet the Healthier Hospitals guideline for low formaldehyde emitting. These products have been tested in accordance with ANSI/BIFMA Standard Method M7.1-2011 (R2016) and comply with ANSI/BIFMA e3-2014 Furniture Sustainability Standard, credits 7.6.1 and 7.6.2.

GREENGUARD certificates are available at [spot.ul.com](http://spot.ul.com).

### Per- and Poly-fluorinated Compounds (PFCs)

Most standard Haworth fabrics do not contain PFC-based, stain- and water-repellant treatments, unless treatment is specified by the customer. A list of fabrics that meet Healthier Hospitals guidelines and Haworth performance standards is available at [surfaces.haworth.com/resources](http://surfaces.haworth.com/resources).

Customers are responsible for COM fabric treatments and chemical content.

### Polyvinyl Chloride (PVC)

Haworth products listed are PVC-free with the following exceptions:

- Worksurface edge molds “Cascade” and “T-Mold” contain PVC. Customers should specify Edgeband options to avoid PVC. Haworth will no longer offer PVC containing edge mold options after December 31, 2018.
- Certain products include PVC material associated with electrical components. PVC content is less than 1% of the total product weight, which meets the Healthier Hospitals guideline exemption.
- Compliance excludes vinyl (PVC) finishes.
- Customers are responsible for COM fabrics.

### Antimicrobials

Most Haworth fabrics are antimicrobial free unless treatment is specified by the customer. A list of fabrics that meet Healthier Hospitals guidelines as well as Haworth performance standards is available at [surfaces.haworth.com/resources](http://surfaces.haworth.com/resources).

Surface finishes associated with Haworth Health Environments products may contain an antimicrobial additive for the sole purpose of preserving the product, which is acceptable by the Healthier Hospitals guidelines. Customers do have the choice of specifying products free of this antimicrobial additive.

Customers are responsible for COM fabric treatments and chemical content.

### Flame Retardants

Haworth products listed meet the Healthier Hospitals guidelines for flame retardants, excluding CAL133 specifications.

Customers are responsible for COM treatments and chemical content.
